

EJS **ALL ACTIVE** **ELECTRONIC JAMB MOUNT SWITCH**

This **low profile, jamb mount, handicap** switch uses our proprietary patented technology to bring you a very easy to use, easy to install, all active switch.

The attractive **stainless steel push plate** is rugged and requires **minimum movement** to activate. This switch needs no internal or external power source to function. This means that there are **no batteries** to replace and **no extra wiring** to install. It will replace a mechanical, normally open, momentary switch. But, because its electronic, there are **no switch contacts to wear out**.

All the benefits of an electronic switch with the durability and the flexibility of a mechanical.

As with all of our products, this switch as been designed for **ease of installation**. With the electronics mounted inside the switch on the back plate, this switch is **surface mount**. Two screws and a hole for the wires are all that's needed for installation. And **we provide the screws and the screw tightening tool**. The switch will also fit on a standard electrical box with a cover plate.

Actuation force: 2 lbs
Contact type: momentary
Dimensions: 4 X 1 5/8 X 3/8 inches
Minimum travel path for actuation: 1/16 inch
Maximum resistance when ON: 1 Ohm
Maximum current through the switch: 1A
Maximum operating voltage: 55VDC or 40VAC
Operating condition: dry or wet
Operating temperature range: -40 to 140 F (-40 to +60 C)
